[1]MIL-STD-810H is a standardized form of testing designed by the US Military to accurately assess device limitations. MIL-STD-810H certification includes tests for Altitude, Humidity, Immersion, Salt Fog, Dust, Vibration, Drop. [2]IP68 rating: Water resistant in up to 1.5 meters of fresh water for up to 30 minutes and protected from dust. Rinse residue/dry after wet. Not advised for beach or pool use. [3]5G network connection available in select markets. Download and streaming speeds may vary based on market, carrier, content provider, server connection and user environment. Check with your carrier for availability and details. [4]Wi-Fi 6E network availability may vary by market, network provider and user environment. Requires optimal connection. Requires a Wi-Fi 6E router, sold separately. [5]Based on average battery life under typical usage conditions. Average expected performance based on typical use. Actual battery life depends on factors such as network, features selected, frequency of calls, and voice, data, and other application usage patterns. Results may vary. [6]POGO fast charger sold separately. [7]Extra replaceable battery sold separately. Only Samsung certified products are compatible for use. [8]Touch-responsiveness may vary depending on the material and thickness of gloves as well as other environmental conditions. Touch Sensitivity increases responsiveness for leather gloves thinner than 2mm or less in thickness, based on internal laboratory test results. The device can be used in wet environments, but not fully submerged under water. Underwater touch is not available. [9]Glove mode is compatible with most gloves and in wet conditions, but does not work as intended with extremely heavy-duty gloves or mittens. [10]Programmable keys are available for select functions; certain apps may not be remapped. [11]Samsung DeX works with most apps. Some apps may require a separate license (purchased separately), or may be unavailable due to partner requests. [12]Samsung DeX wired connection is available via HDMI compatible display. Wireless connection is available on Smart TVs that support Phone Screen mirroring only. For optimal experience, use on Samsung Smart TVs launched in 2019 or later. [13]Implementing Android Work Profile requires use of a supporting enterprise mobility management solution. [14]Availability and timing of Android OS upgrades and features may vary by market. Years of hardware availability and years of security updates are calculated from date of global product introduction. [15]Samsung Care+ for Business services are sold separately. To learn more, visit samsung.com/us/business/solutions/services/samsung-care-plus-for-business/ [16]Total amount of available memory may be less based on configuration. [17]Portion of storage occupied by existing content. [18]MicroSD card sold separately. [19]Measured diagonally as a full rectangle without accounting for the rounded corners. Actual viewable area is less due to the rounded corners and camera hole.
